

A NEW VALVE BRAND WITH A LOT OF EXPERIENCE BEHIND

C O M P A N Y P R O F I L E

Customer satisfaction is important to us.

For over 48 years, CAM S.p.A. has been manufacturing a complete range of mechanical components. Our commitment to quality and customer satisfaction has caused us to develop very proficient machining practices.

From our workshop in Trescore Balneario, we offer a variety of services, including engineering, machining, assembly, testing repairs and servicing. The sectors in which we operate includes Automotive, oil and gas, for which we work to the highest possible standards and the tightest timescales.

CAM VALVES

are covered by a quality assurance program certified and continuously audit by accredited inspection authorities.

Automotive-Valves machining shop in Trescore Balneario.

Valve testing and assembly area in Trescore Balneario.

Established in 1968.

Founded by Angelo Brignoli and Pietro Brignoli in 1968, CAM S.p.A. is a family owned and operated group, which has been working since its foundation in the series machining of medium and high precision range mechanical components for the automotive industry by metal-taking-off machines. In 2015 the young generation of the Brignoli family decided to bring on people with a huge knowledge and experience in design and manufacture of valves.

With the support of the new valve team our aim are short lead times, exemplary quality and good customer service. The know-how and the expertise of our new team resulted in an ongoing success which makes us a reliable supplier.

CAM Valves offers a product Made in Italy complete with API, ISO, PED & SIL accredited production range and in-house testing services which includes Hydrostatic, Pneumatic and Gas testing at cryogenic temperatures down to -196°C .

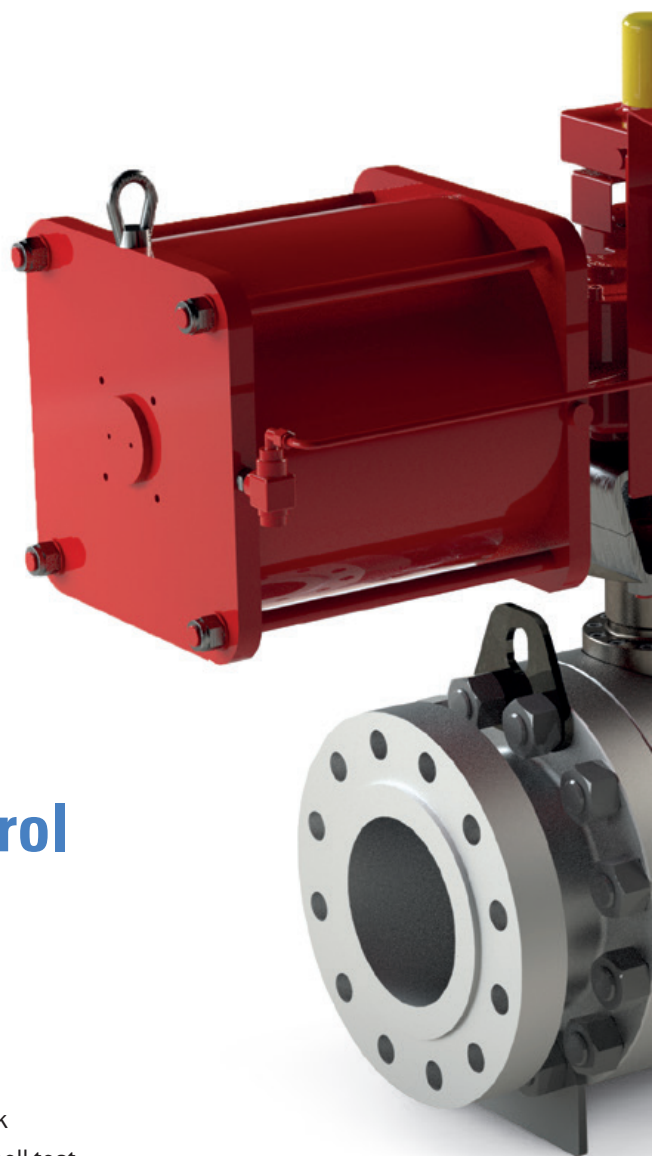

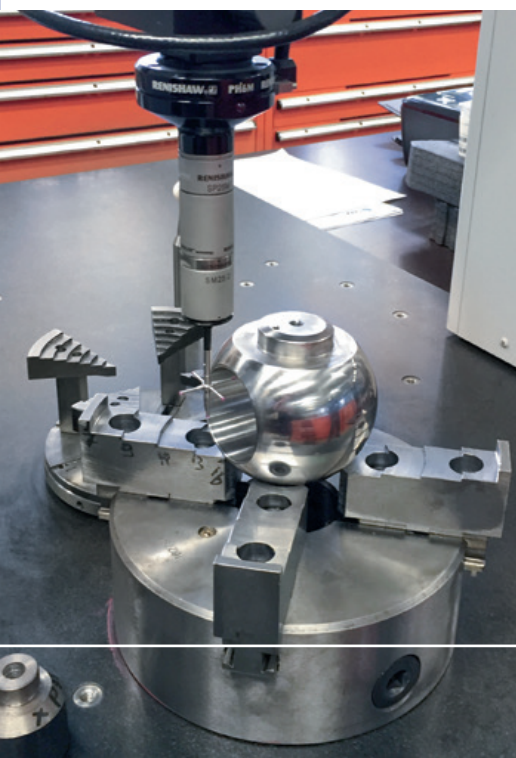

Our modern manufacturing processes enable us to produce a wide range of products, from both bar materials and forgings.

We design On/Off Ball Valves Top entry and side entry constructions, with Split, Modular or Integral dual ball (DBB) body and Through Conduit.

All our products are engineered to withstand and exceed the high risk industry applications in the On/off, ball valves supplied to the Oil & Gas, Petrochemical, Chemical, Marine, LNG, Onshore & Offshore Industries, on topside and subsea.

A large offshore oil rig is illuminated at night, with its lights reflecting on the water. The rig features several tall, lattice-structured derrick towers. In the background, other industrial structures and cranes are visible under a dark sky. A large, stylized blue graphic element, resembling a shield or a large letter 'L', is overlaid on the left side of the image.

Our manufacturing program includes a wide selection of exotic materials and we strive to provide our customers with whatever material they require. Our products are available in the following materials: Stainless steels, Alloy and Carbon steels, Duplex / Super duplex, 6Mo, 17-4 PH, Titanium, Nickel, Monel[®], Inconel[®], Incoloy[®], Hastelloy[®].

Quality control and testing

TESTING FACILITIES

Standard tests

- Visual and dimensional check
- High pressure Hydrostatic shell test (1.5 times pressure rating class)
- High pressure seat test (1.1 times pressure rating class)
- Low pressure air seat test (6/7 Bar)
- Stem torque check

Other tests available on request:

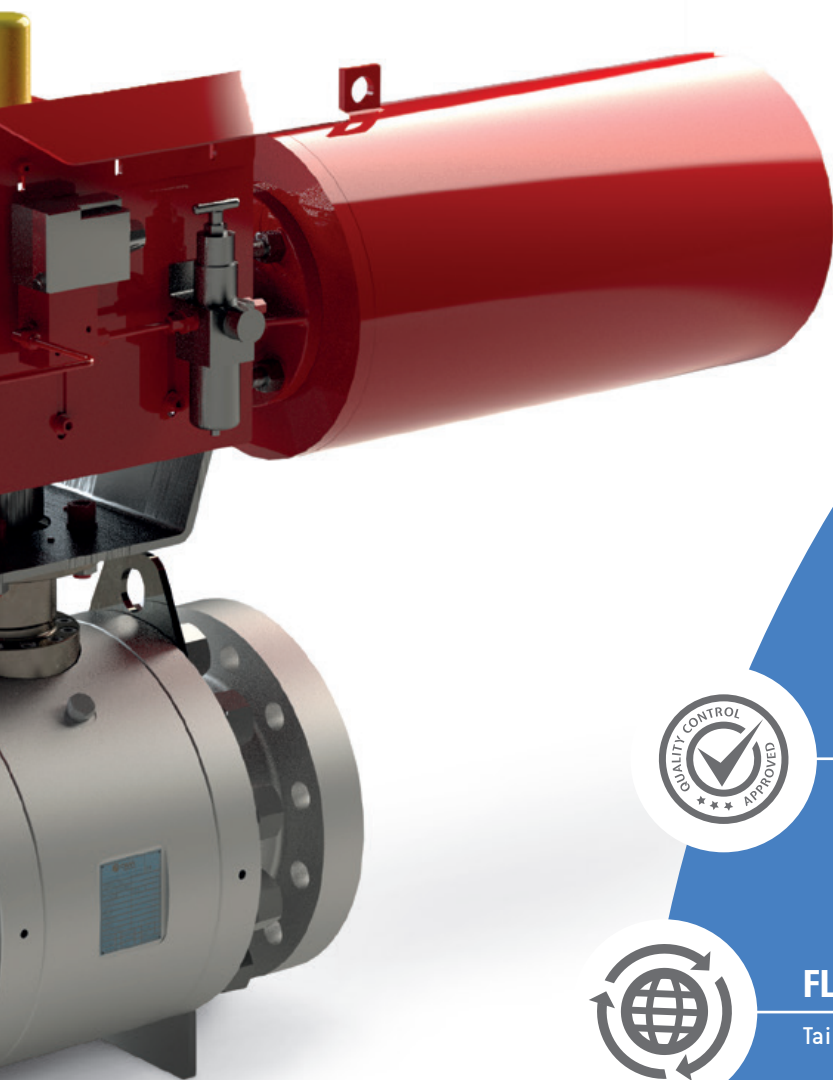

- Cryogenic Test
- Fugitive emission Test
- High pressure body gas test (1 time pressure rating class)
- High pressure seats gas test (1 time pressure rating class)
- Antistatic Test
- Firesafe Test
- Seat self relieving test
- Special tests according to customer specifications

NDT EXAMINATION

- **PMI** - Positive Material Identification
- **DPI** - Dye Penetrant Inspection
- **MPI** - Magnetic Particle Inspection
- **UT** - Ultrasonic Testing
- **RX** - Radiographic examination
- **FE** - Ferrite Content

DT EXAMINATION

- **IT** - Impact test
- **H** - Hardness
- **CT** - Corrosion Test

HIGH QUALITY PRODUCTS

When it comes to product quality, we start from the beginning

FLEXIBILITY

Tailor-made specialty solutions

100% MADE IN ITALY

Italian know-how

FAST DELIVERY

Good organization skills

INNOVATION

Always looking ahead, backed by experience

CERTIFICATIONS

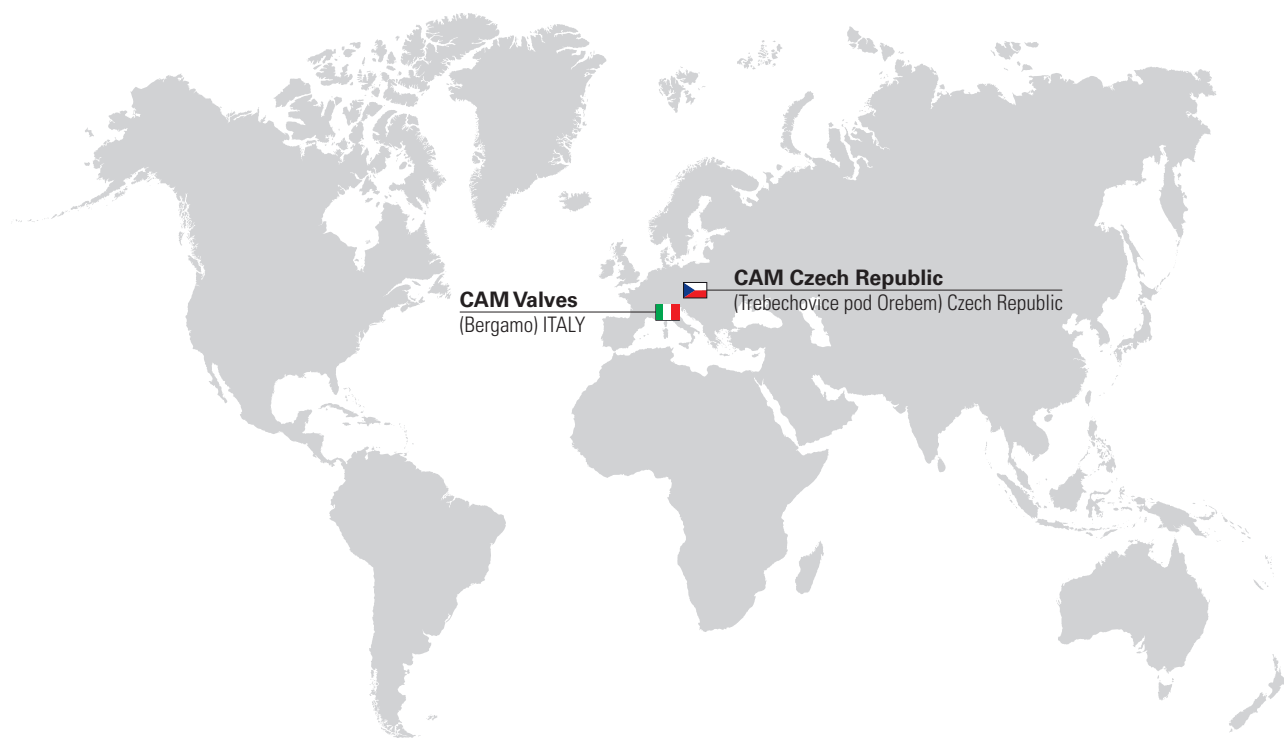

ISO 9001	API
ISO 14000	PED Module H
ISO/TS 29001	SIL 3
OHSAS 18001	ABS
ATEX	BUREAU VERITAS
EAC
